

TAPER PLUS HIGH SPEED ER COLLET CHUCKS

FEATURES & BENEFITS

> BALANCED FOR HIGH SPEED ROTATION

> SMOOTH OUTER DIAMETER

- Eliminates coolant traps which creates mist.
- Smooth surface provides aerodynamics for Hi-RPM and eliminates harmonic vibrations.

> 360° CONTACT & CENTER ROTATION

- Distributes force evenly, eliminating collet rocking thus resulting in better TIR and collet life.

T.I.R.: ≤ 0.0001" run out at collet bore

SPEED: Up to 30,000 RPM

ADVANCED FEATURE FOR TAPER PLUS DUAL CONTACT ONLY

Our new Taper Plus ER Collet Chucks are designed with a Smooth Nut ideal for high speed machining. The Smooth Nuts are made without wrench flats to have better balance, maximize chip evacuation, and prevent coolant flare.
